Information kiosk, e-queue management system

Decree of the President of the Republic of Azerbaijan dated February 25, 2011 “On the simplification and increase of transparency in customs procedures”

E-Management (e-Queue) system has been introduced In order to increase the efficiency and transparency of the services provided by customs and for setting up the sequence of the receipt of the appeals form individuals,

“Information kiosks” were installed in order to provide information on the rules of customs clearance, import/export operations, tariff rates and customs payments, goods nomenclature, and other relevant information.

The legislative framework

Decree of the President № 429 , May 23, 2011

Decree of the President of the Republic of Azerbaijan “On some measures in the sphere of provision of e-services by state agencies”

Our transition to the principles of e-government will also be a very effective factor in the fight against corruption. In general, we must strive to eliminate civil servant-citizen contacts as far as possible. It is now possible to obtain different information and documents through the Internet, electronically. Registration should also be conducted via the Internet. All these issues are listed in the special order I have signed. According to it, every ministry and government agency is to submit suggestions on which of their services should be provided electronically. Let there be no delays with that. This order and its execution are under my direct supervision. Suggestions must be submitted soon. After that even more serious steps will be taken. The fight against corruption and bribery is yielding results, good results.

Strategy for customs modernization on Cross- Border Paperless TF Arrangement
